ATTENTION

Chez certaines personnes, l'utilisation de ce jeu nécessite des précautions d'emploi particulières qui sont détaillées dans la notice jointe

YOU drive eight of the world's most exotic cars, at breakneck speeds, on the fastest roads and tracks imaginable!

- Split screen and link play
- Seven unique tracks
- Four race views, plus 'TV' replay mode

VOUS conduisez huit des voitures les plus extraordinaires du monde, roulant à tombeau ouvert sur les routes et les pistes les plus rapides qu'on puisse imaginer.

- Ecran partagé et possibilité de jouer en réseau.
- 7 tracés inédits.
- Possibilité de suivre la course sous quatre angles différents et fonction ralenti, comme à la télévision.

SIE haben die Gelegenheit, mit halsbrecherischer Geschwindigkeit acht der wohl exotischsten Autos der Welt zu fahren - und das auf den schnellsten Straßen und Strecken, die Sie sich nur vorstellen können!

- Über geteilten Bildschirm und Kabel-Verbindung
- Sieben einzigartige Strecken
- Vier verschiedene Ansichten sowie ein Wiederholungs-Modus in TV-Qualität

Conduzca ocho de los coches más exóticos del mundo a velocidades de vértigo, ien las carreteras y los circuitos más rápidos jamás imaginados!

- Juego a pantalla partida y mediante cable de conexión
- Siete circuitos únicos
- Cuatro vistas en carrera, más un modo de repetición modo TV

STARTING THE GAME

1. Set up your "PlayStation" game Console according to the instructions in the Instruction Manual. **Make sure the power is OFF before inserting or removing a compact disc.**
2. Insert the *Need for Speed* disc and close the CD door.
3. Insert game Controllers and turn on the "PlayStation" game Console. When the language screen appears use the Directional button **up/down** to highlight the language. Use the **X** button to advance to the next screen.
4. To skip the introductory videos, press **START**. The Title screen appears.
5. Press **START** or **X** to continue to the Game Mode screen. See *Game Mode*.

Need For Speed supports analogue Controllers and has provided the configuration for the Namco neGcon controller.

EA TIP: Use configuration 4 when using the Mad Catz steering wheel.

WELCOME!

Welcome to the high-speed world of *ROAD & TRACK*® Presents: *The Need for Speed*™! *The Need for Speed* combines spine-tingling action with awesome graphics. As you race down an alpine road in your choice of eight high performance cars, you'll be amazed by the detail and realism. The sophisticated physics model recreates the feel of the cars themselves; you'll notice the difference in handling, braking, and raw power. Plan your strategy for each track—there are six to choose from during normal play, and each demands a different style of driving. There's also a bonus track if you win the Tournament. The four game modes include options to compete against a second player via Link mode or on a split screen. With different cars, different tracks, and different styles of racing fuelling your need for speed, you'll find your addiction growing to a fever pitch. No need to worry—when you crash and burn in this game, there's always another day.

- 7 different race locations—3 open road tracks and 3 closed circuit tracks, plus 1 bonus track.
- 8 exotic automobiles.
- 4 race types
- Multiple camera angles and instant replay let you see your spectacular crashes in full detail.
- Beautiful graphics improve the sensation of speed.

GAME MODE

Select a one or two player game, view Records, and configure Options. The following controls are used for all screens and menus.

Game Mode Options

ONE PLAYER: Race against computer opponents or race against the clock in Time Trials.

TWO PLAYERS: Race with a friend on a split screen.

LINK MODE: Race with a friend using two "PlayStation" game Consoles linked by a cable. See *Link Mode*.

RECORDS: View records for different tracks and race configurations. See *Records* for more information.

OPTIONS: **SELECT THE OPTIONS FOR YOUR RACE. SEE OPTIONS FOR MORE INFORMATION.**

- When finished, press **X**. The Race Type screen appears.

OPTIONS

Customise your game sound, and control options.

Audio

- To adjust Audio volumes, highlight the sound option you want to adjust and Directional button **left/right**.

SONG SELECT: Choose a song to hear while racing. The song that you choose starts to play a moment after you have finished cycling through the choices.

MENU MUSIC VOLUME: Adjust the volume of music played in the menus and between races.

RACING MUSIC VOLUME: Adjust the volume of music played during the game.

SOUND EFFECTS VOLUME: Adjust the volume of sound effects played during the game.

NARRATION: Toggle the narrator ON/OFF.

STEREO: Toggle between STEREO/MONO. (Select MONO if you do not have a stereo TV.)

- When you are finished, press **X** to accept changes. The Options screen appears.
- To return to the Options screen, press **■**.

Controls

- To select the Controller to be configured, highlight the Player bar and Directional button **left/right**.

- To cycle through different Controller configurations, highlight the Configuration bar and Directional button **left/right**. A chart of the new control configuration appears.
- When you are finished, press **X** to accept changes or press **■** to return to the previous screen. The Options screen appears.

Memory Card

- To access Memory card options, highlight the option you want and press **X**.
- Note:** After inserting your Memory card, please wait a few seconds before saving or loading.

Memory Card: Toggle between Memory cards 1 and 2.

Load Records: Load all records saved on the memory card.

Save Records: Save records set during the current session.

Save Settings: Save customised option settings.

Save Tournament: Save current tournament standings.

- When finished, press **X** to accept changes.
- Press **■** to return to the Options menu.
- When finished, press **■** to return to Game Mode screen.

View Credits

- To view credits, highlight the View Credits bar and press **X**.
- When finished, press **■** to return to Game Mode screen.

RACE TYPE

Choose one of four different kinds of races.

Time Trial

Race in any car on any track against the clock. This is a flat out duel against time; there are no cops or traffic to distract you.

EA TIP This is a great mode for practising and learning the cars and tracks. Start with Rusty Springs Raceway and Autumn Valley Speedway, as they are easier to learn on than the more winding tracks.

When you set records in this mode, they are marked by a "T.T." to distinguish them from records obtained during a race.

Head to Head

Race against a single opponent, either the computer or another player on a split screen or in Link Mode. You can select any car or track. If you select an open road track (i.e., Alpine, Coastal, or City), you'll face traffic and cops to make things more challenging. Records in this mode are marked by an "H.H." to distinguish them from records obtained during a race.

NO MERCY MODE

To disable traffic, cops, and any computer racing assistance between opponents: Highlight HEAD TO HEAD, and press and hold L1 + R2. While holding L1 + R2, press **X** to choose No Mercy Mode and advance to the Race Location screen.

Single Race

Select this mode to race against seven computer opponents, or six computer opponents and a friend. The car you select for your computer opponent is used by all computer drivers unless you select THE PACK, in which case each type of car will be raced by a different computer driver. The open road tracks have been blocked off to public traffic for this event, and the cops are down at the local donut shop.

Tournament

This mode lets you participate in a Tournament in which you must place first on all tracks to win the Championship and advance to a BONUS Track.

TO START A TOURNAMENT

1. Select TOURNAMENT from the Race Type screen.
2. At the Tournament screen there are four options:

START NEW: Start a new Tournament.

PASSWORD: Enter a password to resume a saved tournament.

1. Select **PASSWORD** from the Tournament screen.
 - Directional button **up/down** to change letters.
 - Directional button **left/right** to change spaces.
2. Press **START** to enter your tournament password.
3. The Race Location screen appears.

CONTINUE: Continue a tournament.

MEMORY CARD: Toggle Memory card 1/Memory card 2 to load a saved tournament.

Each track is rated for a particular performance class of cars. By selecting a track, you are assigned to the corresponding **Tournament Class A, B, or C**. This defines the cars you can select. Your opponents are seven computer controlled cars in the same class.

Tournament Class C: City and Rusty Springs Raceway featuring the Mazda RX-7® , the Acura NSX®, and the Toyota Supra® Turbo.

Tournament Class B: Coastal and Autumn Valley Speedway, featuring the Porsche® 911 Carrera, the Dodge Viper® RT/10, and the Corvette® ZR-1.

Tournament Class A: Alpine and Vertigo Ridge, featuring the Lamborghini Diablo® VT and the Ferrari® 512TR.

You may select the tracks in any order. If you place 1st on any track, a win video plays, and that track is marked with a chequered flag. When you place 1st on all tracks, you receive access to a Bonus track. The Bonus track becomes accessible through the Race Location screen.

You can save your place in a Tournament after you win on a track. See *Memory Card*.

- Choose the type of race you want and press **X**. The Race Location screen appears.

RACE LOCATION

It's time to select the track. Initially, there are six tracks to choose from. Three are open road tracks, and three are closed circuit tracks. A seventh bonus track becomes available *only* after you've won on all six tracks in Tournament mode. The open road tracks are Alpine, Coastal, and City. These tracks are divided into three segments with each segment ending with a Checkpoint. The closed circuit tracks are Rusty Springs Raceway, Autumn Valley Speedway, and Vertigo Ridge.

Note: In Tournament mode, only certain cars can be driven on specific tracks. (See *Tournament*.)

If the Track you chose is an open road track, a detailed Segment map is displayed.

- To cycle through the segments, highlight the SEGMENT VIEW bar and Directional button **left/right**.

If the Track you chose is a closed circuit track, the entire circuit is displayed with numbers marking the major turns. You also have the option to choose the number of laps for the race.

Note: In Tournament mode, the number of laps is always set to NORMAL.

- To cycle through the lap choices, highlight the LAPS bar and Directional button **left/right**.
- To cycle through lighting effects for different times of day, highlight the MIDDAY bar and Directional button **left/right**.

Note: On each track there are three settings for time of day.

- When finished, press **X**. The Car Selection screen appears.

CAR SELECTION

Before you start burning rubber, you need to choose a car that suits your driving style. We've included eight high performance cars to choose from—the ones you've dreamed about taking out on the road. All performance and design statistics are in the game, but you can always check out a car's performance for yourself by taking it for a test drive.

- To cycle through the different cars, highlight the car photo and Directional button **left/right**.
- To toggle between manual and automatic gear shifting, highlight the AUTOMATIC bar and Directional button **left/right**.

AUTOMATIC SHIFT MODE

In Automatic, your gear options comprise Reverse, Neutral, and Drive. The car automatically shifts into a higher or lower gear, letting you concentrate on steering, braking, and *accelerating*. Automatic mode is a good way to start out, but to squeeze the last ounce of performance out of each car you have to master the Manual shift mode.

MANUAL SHIFT MODE

In Manual, you change gear by yourself. This takes concentration and dexterity. If you can make it through a race successfully at this level, you are a true master of the road.

- To shift up, press **R1** or **L1**.
- To down-shift, press **R2** or **L2**.
- To access the Car Showcase screen to view all the cool stats and specs, highlight CAR SHOWCASE and press **X**. See *Car Showcase Screen* below for more information.

Selecting Your Car

TIME TRIAL

- When you have selected the car that you want, press **X**. The race begins.

HEAD TO HEAD

1. When you have selected the car that you want, press **X**. The Opponent selection screen appears.
2. When you have selected a car for player 2 or the computer opponent, and press **X**. The race begins.

SINGLE RACE

1. When you have selected the car that you want, press **X**. The Opponent selection screen appears.
2. If you are playing a two player game, select a car for Player 2 and press **X**. The Opponent selection screen will reappear.
3. Select a car for your computer opponents.
 - To race against seven different cars at the same time, cycle through the car choices until you reach THE PACK, and press **X**. The race begins.
 - To race against seven cars that are all the same model, select the model that you want and press **X**. The race begins.

TOURNAMENT

- When you have selected the car that you want, press **X**. The race begins.

Note: In Tournament mode your car selection is limited to specific cars depending on which track you are racing. To learn which cars are available on which tracks, see *To Start A Tournament*.

Car Showcase Screen

The Car Showcase screen displays the following five options:

- To access each showcase screen, highlight the category you want and press **X**.
- To return to the Car Showcase screen from any of the following screens, press **■**.
- When finished, press **■**. The Car Selection screen appears.

GENERAL: Price, weight, and wheelbase are examples of the info you'll find here. Check out the classy shots of the car from every angle.

PERFORMANCE: Acceleration and top speed are just a couple of the performance statistics you'll read and hear about at this showcase screen. Statistics and voice-over commentary are supplied by ROAD & TRACK.

MECHANICAL: Engine type and chassis layout give you the information you need to select a car for a specific open road or closed circuit track.

HISTORY: Like to get the whole story behind the development of your car? Select this option to read and hear all about it. You'll also see a photo montage of early models.

VIDEO: Select this option to see a smokin' video of each car in action. Press any button to exit this video.

All statistics and voice-overs are provided by ROAD & TRACK, the premiere auto-enthusiast's magazine.

TAKING IT TO THE STREETS

Now it's time to satisfy a certain need—pin the accelerator and feel the G's.

- To start the game select your race type, race location, and car, then press **X**. The game loads and you are taken to the cockpit of your car.

Note: To remove the Heads-Up Display, hold (down arrow) for one second. In split-screen mode, both players must hold the (down arrows) at the same time.

Racing Map

The Need for Speed cockpit sports a high tech race map. A quick glance shows you your relative position and prepares you for upcoming turns.

Computer opponents

Player one

Upcoming turn

When the race begins you must change gear out of neutral and into first to get the car moving. The default gear shift mode is Automatic. See *Car Selection* for information on changing gear shift modes.

- To shift up, press **R1** or **L1**; to down-shift, press **R2** or **L2**.

Watch the starting lights in the centre of the game screen—when the green light comes on, shift into 1st and hit the gas!

LINK MODE

In order to play via link mode you must have two monitors, two "PlayStation" game Consoles connected by a link cable, and two copies of *The Need For Speed*.

Setting up a Link Mode game

1. Make sure the link cable is connected to both machines before starting *The Need for Speed*.
2. If the link cable is connected it is automatically detected. The LINK MODE option will be available on the Game Mode screen when *The Need for Speed* starts.

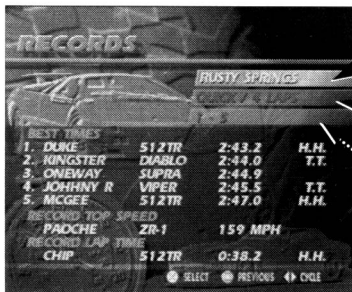

Note: Both players must be on the Game Mode screen.

3. Either player may select LINK MODE.
4. The first player to select LINK MODE is player 1 and receives a "Linked" message at the bottom of the screen. The other player receives the message "Linked: other player has control". The Race Type screen appears.

- At the Race Type screen player 1 makes the selection. The Race Location screen appears.
 - Player 1 chooses the race location. The Car Selection screen appears.
 - Player 1 chooses his car, then player 2 chooses his own car. If you are racing a SINGLE RACE, player 1 chooses the opponent's car. Each player will see a picture of his own car as the game is loading. Get ready to race!
- Note:** In Link mode TOURNAMENT and TIME TRIAL races are not available.

RECORDS

View records for best times and speeds for all tracks and race configurations.

Cycle through the different tracks

Cycle through lap configurations

View places 1-5 or 6-10

Note: To save new records, see *Memory Card*.

- To cycle through records set on different tracks, highlight the bar with the track name and Directional button **left/right**.

- To cycle through records for races with different numbers of laps (circuit tracks only), highlight the bar with the lap numbers and Directional button **left/right**.
- To toggle between records 1-5 and 6-10, highlight the bar with the place numbers and Directional button **left/right**.
- When finished, press **■** or **X** The Game Mode screen appears.

COPS

One of the major obstacles to going as fast as you want, when you want, is the presence of law officers. When racing on an open road track in Head to Head mode, you'll see them in force. If you keep an eye on your map and your ear tuned to your radar detector, you can try to avoid them. The police cruiser shows up as a red and blue flashing light on your race map. Whatever you do, don't crash when there are cops around and don't let them pass you are certain to get a ticket.

- If a cop catches you, you'll receive a speeding ticket. If you get two speeding tickets on any segment, you are arrested and disqualified from the race.

FINISH LINE/CHECKPOINTS

At the end of the three closed circuit tracks you receive Game Standings. On the three longer, open road tracks, which are divided into three segments, each segment ends in a Checkpoint.

When you end a race or pass through a Checkpoint, your car screeches to a stop and you are taken to a Game Standings screen. This displays the current rank, average speed, top speed, and a running total for the race/segment. If you break a record, you are prompted to enter your name into the records. You can also see a breakdown by lap.

- When you're done looking at your performance statistics, press **X**. The Finish/Checkpoint menu appears.

NOTE: You cannot press **■** to go to the previous screen at this point.

TO ENTER YOUR NAME

- To choose a letter, Directional button **up/down**.
- To move between spaces, Directional button **left/right**.
- When finished press **START**. Your name is entered into the records.

The Finish/Checkpoint Menu

The Finish/Checkpoint menu gives you an opportunity to make changes and review your run.

- To select a Checkpoint menu option, press **X**.

CONTINUE: If this is a Checkpoint, you return to your game in progress. If this is the end of the race, you return to the Race Location menu.

HIGHLIGHTS: Highlights include all of the best crashes, passes, skids, power slides, and jumps of the race you just drove. It offers several camera angles, and you can view the tape in several different ways to gain a greater understanding of the road and its hazards or to watch a fantastic wipe-out in slow motion! The camera views available are In-Car, Tail, Heli (as if the camera were in a helicopter), Sky, and Chase Cam. If an opponent or cop car is nearby you can get a view from their perspective as well. Highlights automatically show the best parts of the previous race, but you can take control and view them in any order you want—Just grab the controller and follow the on-screen video instructions or see *Replay* for video controls.

RESTART: Select this option to restart the same race you just finished.

QUIT: Select this option to exit the race and return to the Game Mode screen.

WINNING AND LOSING

In a race against opponents, the object is to place first on a chosen track. At the completion of a race on an open road track, all segment times are added together. The winner is the one with the lowest total open road track time. At the end of the race, a Game Standings screen listing the total standings appears and a video plays for the winner.

If you're racing against the clock, you don't really win or lose, but work instead to place a best time or top speed.
